

Janssen in the Benelux

Collaborating with the world for the health of everyone in it

In the Benelux region, Janssen researches and develops treatments, vaccines and preventive solutions for some of the most devastating disorders and complex medical challenges of our times. We focus on oncology, neurosciences, infectious diseases & vaccines, immunology, pulmonary hypertension and cardiovascular & metabolism, with the ultimate goal of creating a healthier world.

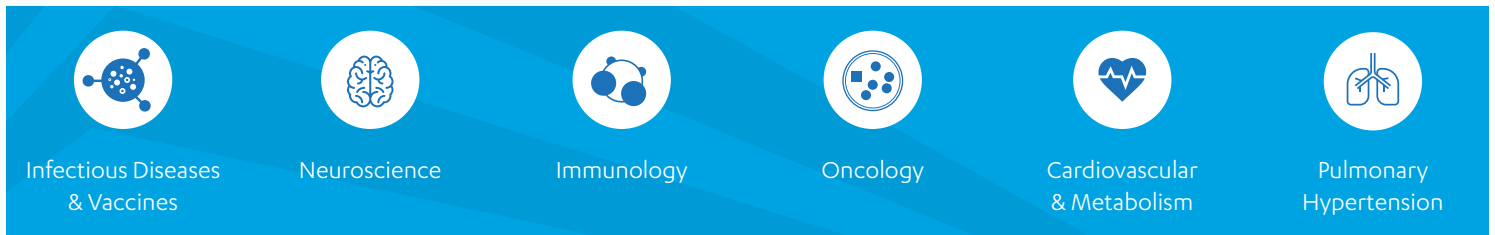

“ Together with the governments and all our partners, we want to realize a vision in which the wellbeing of our patients is first and central. ”

Sonja Willems
Managing Director, Janssen Benelux

Our focus

We are developing and producing innovative treatments and vaccines. We bring them to patients in **six therapeutic areas**.

“ It’s very special to have all focus areas in the chain, from prevention and R&D to production and market access, in one country: the Netherlands. ”

Paul Korte
External Affairs Director,
Janssen The Netherlands
